

Golden Bear Realty International Expands into New Office *Nicklaus Family-Owned Firm Experiencing Growth*

NORTH PALM BEACH, FL, November 9, 2009 -- Golden Bear Realty International, a Nicklaus family-owned realty and brokerage firm, has expanded into a new 4,300 square foot office located at 11811 U.S HWY 1 at PGA Blvd. The new office is across the street from its original location in Oakbrook Square. Bucking a national and regional trend in real estate, Golden Bear Realty has experienced growth in 2009 and has increased its number of agents and listings.

“We attribute our success during this economic climate to the international marketing syndication of our homes, our extensive agent training, and brand name recognition,” said Michael Nicklaus, president of Golden Bear Realty International. “The new office will accommodate our continual growth.”

Golden Bear Realty agents receive on-going education by one of the nation’s premier real estate trainers, administrative support and health insurance, a rarity in this business. These benefits attract quality agents like new hire MJ McElwaney, a seasoned real estate professional who specializes on Jupiter Island.

“Golden Bear Realty offers the integrity, personalized care and professionalism associated with its brand, embodying everything that is important to me as a realtor,” said McElwaney. “The services offered to us have far exceeded my expectations and their marketing tools are bringing me buyers from around the world.”

The international syndication program is a proprietary realtor sales portal that places Golden Bear Realty International’s listings onto sites throughout the globe that reach high end buyers. The program is designed to sell homes and attract the right price by going well beyond traditional tools of listing homes on MLS and placing local advertisements.

“Our new office is exactly what I always envisioned Golden Bear Realty to one day become: a high-caliber office where one can achieve success,” said sales manager Todd Vance. “Our world-wide appeal, unique training, and office setting provide our professionals the blue print on how to build a true real estate business.”
